Jacobo de Jesús Castillo Pacheco

Systems Engineering Student | Junior Software & Data Opportunities

El Salvador · jacobodejesuscastillopacheco@gmail.com · GitHub

PROFILE

Systems Engineering student at Universidad de El Salvador interested in software development, Python, automation, web technologies and data. I build practical projects to learn how digital tools can make information and everyday workflows clearer. Previous technical studies in Primary Health Care give me a human-centered perspective on operational problems; I am not presenting myself as a healthcare professional.

TECHNICAL SKILLS

Python; JavaScript; HTML; CSS; SQL; SQLite; Git; GitHub; Linux; Debian; CSV processing; data quality; browser-based web projects; automation concepts

SELECTED PROJECTS

- HealthOps Intelligence — Python, SQLite, HTML, CSS and JavaScript operations dashboard using fictional data; portfolio demo, not certified clinical software.
- StockPilot — Python and SQLite local inventory ledger with product records, stock movements and low-stock checks.
- Python Office Tools — Python standard-library utilities for CSV cleaning, reconciliation, safe file-operation workflows and job tracking.
- Business Sales Dashboard — static HTML/CSS/JavaScript dashboard with deterministic synthetic orders, filters, calculated KPIs and CSV export.

EDUCATION

- Universidad de El Salvador (UES) — Systems Engineering, studies in progress.
- Instituto Nacional de Usulután — Technical High School Diploma in Primary Health Care, 2023–2025.
- Escuela Profesora Concepción Alemán Córdoba — School education, 2014–2022.

ACADEMIC PRACTICE

Academic practice — Hospital San Pedro, 2025 | Approximately three months, rotating through the emergency area as part of formative academic practice. Not employment.

EARLY-CAREER INTERESTS

Junior Python Developer; Junior Frontend Developer; Junior Software Developer; Data Operations; Junior QA; Technical Support; Junior Automation Developer
